Campus Compact > About Us > Who We Are

**Who We Are**

Campus Compact is a national coalition of more than 1,100 college and university presidents who are committed to fulfilling the public purpose of higher education. As the only national higher education association dedicated solely to campus-based civic engagement, Campus Compact promotes public and community service that develops students' citizenship skills, helps campuses forge effective community partnerships, and provides resources and training for faculty seeking to integrate civic and community-based learning into the curriculum. Campus Compact's membership includes public, private, two- and four-year institutions across the spectrum of higher education.

Campus Compact comprises a national office based in Boston, MA, and state affiliates in CA, CT, FL, HI, IL, IN, IA, KS, KY, ME, MD-DC, MA, MI, MN, MO, MT, Mountain West, NE, NH, NJ, NY, NC, OH, OK, OR, PA, RI, SC, TN, UT, VT, WA, WI, and WV.

**Introduction**

**The Chinese Univ. of Hong Kong**

The Service-Learning Programme of Chung Chi College was established in February 2000. It is designed as part of the College General Education.

Currently, we have three components

- (1) Local---There are eight agencies in Hong Kong that we do service-learning with.
- (2) Mainland---This summer, the Mainland Service-Learning Programme will be conducted in Yangshuo, Guangxi Province and Qingyuan, Guangdong Province in China. Students can choose between the two service locations. We will help poor rural high school students to learn English in Yangshuo area and provide service to the local community in Qingyuan area.
- (3) International----We send students to do service-learning in Indonesia, India, Korea and the Thailand.

Service-learning as a  
pedagogy for connecting  
self-other-world

*serve, reflect, learn*

# Connection with self-other-world

- 1. Service-learning contributes to the development of the whole person**
- 1. Service-learning helps students to become critical, caring and responsible (global) citizens**
- 2. Service-learning engages the university and the academic community in the world: reciprocity**

# 1. Service-learning contributes to the development of the whole person

(Inter)personal development of the student:

- Self: **Head, hands, heart**
- Other: Awareness of **social responsibility**; explicit attention for connectedness: “care first and learn from”
- World: Broad education of the student with a clear link to society and contemporary reality

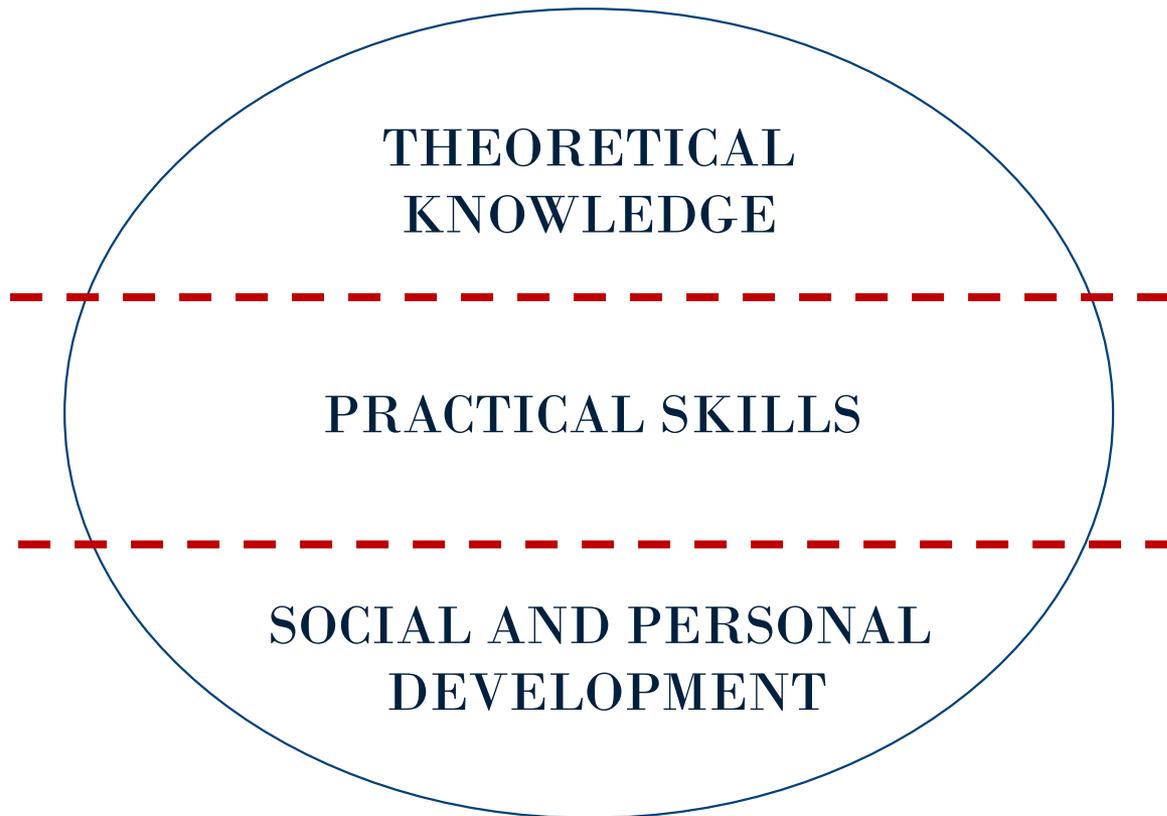

# Three types of learning

**THEORETICAL KNOWLEDGE  
(CONTENT BASED)**

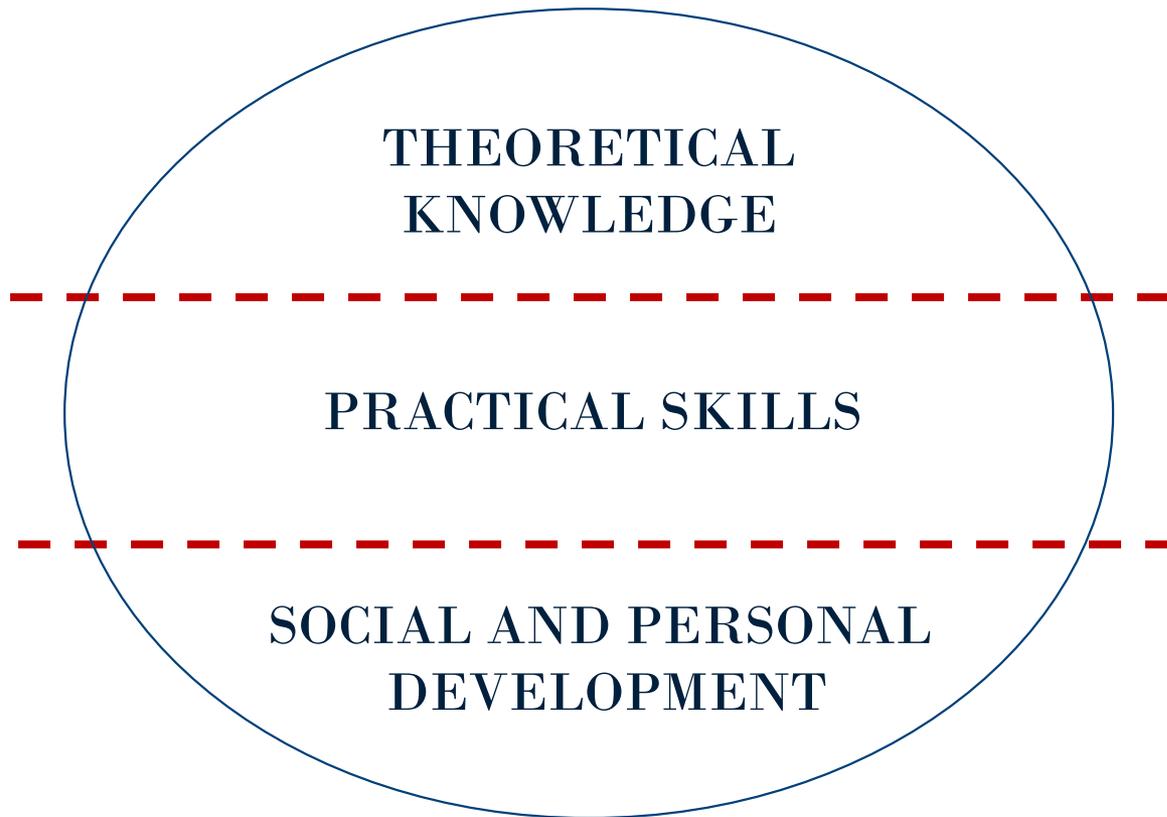

**PRACTICAL SKILLS**

**SOCIAL AND PERSONAL DEVELOPMENT**

# Compartmentalization of types

# Service-learning

# Personal development: a leap into the unknown

## Experiencing:

- Vulnerability, fragility
- Questioning assumptions, models, values, ...
- What transcends us

To accept the uncertain

Becomes a story → and therefore formative

The story of the OTHER becomes part of my story

## 2. Service-learning helps students to become critical and responsible (global) citizens

- “Civic education” : **Active, critical, caring and responsible** citizens
- This can be achieved through, among other things, the development of **empathy** for the vulnerable, **insight** into structural injustice and inequality, and *the strengthening of willingness to solidarity*
- **Solidarity** = relationship to the stranger whom I do not encounter, but who is, like me, a human being. Solidarity is then a preparation for the future and at the same time a grounding in the present (Radest 1993)

## High-Impact Educational Practices

### First-Year Seminars and Experiences

Many schools now build into the curriculum first-year seminars or other programs that bring small groups of students together with faculty or staff on a regular basis. The highest-quality first-year experiences place a strong emphasis on critical inquiry, frequent writing, information literacy, collaborative learning, and other skills that develop students' intellectual and practical competencies. First-year seminars can also involve students with cutting-edge questions in scholarship and with faculty members' own research.

### Common Intellectual Experiences

The older idea of a "core" curriculum has evolved into a variety of modern forms, such as a set of required common courses or a vertically organized general education program that includes advanced integrative studies and/or required participation in a learning community (see below). These programs often combine broad themes—e.g., technology and society, global interdependence—with a variety of curricular and cocurricular options for students.

### Learning Communities

The key goals for learning communities are to encourage integration of learning across courses and to involve students with "big questions" that matter beyond the classroom. Students take two or more linked courses as a group and work closely with one another and with their professors. Many learning communities explore a common topic and/or common readings through the lenses of different disciplines. Some deliberately link "liberal arts" and "professional courses"; others feature service learning.

### Writing-Intensive Courses

These courses emphasize writing at all levels of instruction and across the curriculum, including final-year projects. Students are encouraged to produce and revise various forms of writing for different audiences in different disciplines. The effectiveness of this repeated practice "across the curriculum" has led to parallel efforts in such areas as quantitative reasoning, oral communication, information literacy, and, on some campuses, ethical inquiry.

### Collaborative Assignments and Projects

Collaborative learning combines two key goals: learning to work and solve problems in the company of others, and sharpening one's own understanding by listening seriously to the insights of others, especially those with different backgrounds and life experiences. Approaches range from study groups within a course, to team-based assignments and writing, to cooperative projects and research.

### Undergraduate Research

Many colleges and universities are now providing research experiences for students in all disciplines. Undergraduate research, however, has been most prominently used in science disciplines. With strong support from the National Science Foundation and the research community, scientists are reshaping their courses to connect key concepts and questions with students' early and active involvement in systematic investigation and research. The goal is to involve students with actively contested questions, empirical observation, cutting-edge technologies, and the sense of excitement that comes from working to answer important questions.

### Diversity/Global Learning

Many colleges and universities now emphasize courses and programs that help students explore cultures, life experiences, and worldviews different from their own. These studies—which may address U.S. diversity, world cultures, or both—often explore "difficult differences" such as racial, ethnic, and gender inequality, or continuing struggles around the globe for human rights, freedom, and power. Frequently, intercultural studies are augmented by experiential learning in the community and/or by study abroad.

### Service Learning, Community-Based Learning

In these programs, field-based "experiential learning" with community partners is an instructional strategy—and often a required part of the course. The idea is to give students direct experience with issues they are studying in the curriculum and with ongoing efforts to analyze and solve problems in the community. A key element in these programs is the opportunity students have to both *apply* what they are learning in real-world settings and *reflect* in a classroom setting on their service experiences. These programs model the idea that giving something back to the community is an important college outcome, and that working with community partners is good preparation for citizenship, work, and life.

### Internships

Internships are another increasingly common form of experiential learning. The idea is to provide students with direct experience in a work setting—usually related to their career interests—and to give them the benefit of supervision and coaching from professionals in the field. If the internship is taken for course credit, students complete a project or paper that is approved by a faculty member.

### Capstone Courses and Projects

Whether they're called "senior capstones" or some other name, these culminating experiences require students nearing the end of their college years to create a project of some sort that integrates and applies what they've learned. The project might be a research paper, a performance, a portfolio of "best work," or an exhibit of artwork. Capstones are offered both in departmental programs and, increasingly, in general education as well.

### Diversity/Global Learning

Many colleges and universities now emphasize courses and programs that help students explore cultures, life experiences, and worldviews different from their own. These studies—which may address U.S. diversity, world cultures, or both—often explore "difficult differences" such as racial, ethnic, and gender inequality, or continuing struggles around the globe for human rights, freedom, and power. Frequently, intercultural studies are augmented by experiential learning in the community and/or by study abroad.

### Service Learning, Community-Based Learning

In these programs, field-based "experiential learning" with community partners is an instructional strategy—and often a required part of the course. The idea is to give students direct experience with issues they are studying in the curriculum and with ongoing efforts to analyze and solve problems in the community. A key element in these programs is the opportunity students have to both *apply* what they are learning in real-world settings and *reflect* in a classroom setting on their service experiences. These programs model the idea that giving something back to the community is an important college outcome, and that working with community partners is good preparation for citizenship, work, and life.

### Internships

Internships are another increasingly common form of experiential learning. The idea is to provide students with direct experience in a work setting—usually related to their career interests—and to give them the benefit of supervision and coaching from professionals in the field. If the internship is taken for course credit, students complete a project or paper that is approved by a faculty member.

### 3. Service-learning engages the university and the academic community in the world: locally and internationally

- In dealing with 'the other', the other also **transforms us**, also as community
- Attention to the margin helps us to discern what is important: also in terms of **research**
- Challenges us to think about our place as university in the world, and how we can relate academically to that world: **reciprocity**
